For railroad hopper cars, placards must be placed on both sides of the car near the ladders and next to the top hatches into which the fumigant is introduced.

The Shipper and/or the fumigator must provide written notification to the receiver of railcars, railroad boxcars, shipping containers and other vehicles, which have been, fumigated in-transit. A copy of the Applicator's Manual must precede or accompany all transportation containers or vehicles, which are, fumigated in transit. If the Applicator's Manual is sent with the transport vehicle it must be placed securely on the outside of the railcar, railroad boxcars, shipping containers and other vehicles. Persons with documented training in the handling of Phosphine products must be responsible for receiving, aerating and removal of placards from vehicles, which have been fumigated in transit.
