Bird Netting

Bird Spikes

Live Traps—Pigeon, Sparrow, Grackle, etc.

Scare Eye Balloons

Plastic Owls

Sonic Propane Cannons

Streamlight Rechargeable Flashlights—Lifetime Guaranteed

Orange TKO Cleanser

Carbon Dioxide Fumigation

These products are recognized as organic approved by various certification organizations, but not by all. Government USDA NOP certification does not mean that your particulate certifier will recognize the product as organic. There is not a general consensus as of yet. At this time there is a lot of work being done at Purdue University on ozone as fumigant and this may prove to be a viable fumigation option. We currently utilize carbon dioxide as our organic fumigant.
