**FASTRAC® PLACE PACS**

**Norway rats, Roof rats and House mice usually consume a lethal dose in a single night's feeding, but it may take two or more days from the time of bait consumption for these rodents to die.**

This Product May Only be Used Inside and Within 100 Feet of Man-Made Structures

**KILLS RATS, MICE, AND MEADOW VOLES**

**KILLS ANTICOAGULANT RESISTANT NORWAY RATS, ROOF RATS AND HOUSE MICE**

KEEP OUT OF REACH OF CHILDREN

CAUTION

See Back Panels for First Aid and additional precautionary statements.

ACTIVE INGREDIENT:

Bromethalin (CAS #63333-35-7): 0.01%

OTHER INGREDIENTS‡: 99.99%

‡Contains Denatonium Benzoate

TOTAL 100.00%

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.

**NET WT:**

4 lbs (1.8 kg)

121 x 0.53 oz (15 g) Place Pacs
**FASTRAC® PLACE PACS**

**KILLS RATS, MICE, AND MEADOW VOLES**

*Norway rats, Roof rats and House mice usually consume a lethal dose in a single night, but it may take two or more days from the time of bait consumption for these rodents to die.*

**DIRECTIONS FOR USE**

Do not sell this product in individual containers holding less than 4 pounds of bait.

**SELECTION OF TREATMENT AREAS:** Determine areas where rats, mice or meadow voles* will most likely feed and consume the baits. Generally, these areas are along walls, by, grassed openings, in corners and concealed places, between floors and walls, or in locations where signs of rodents have been seen. Protect bait from rain and snow. Remove as much alternative food as possible.

**APPLICATION DIRECTIONS:**

**Rats:** Apply 2 to 12 place pac per placement (usually at intervals of 15 to 30 feet). Adjust the amount of bait applied to the level of rat feeding expected at each bait placement.

**Mice and Meadow Voles:** Apply 1 place pac per bait placement. Space placements at intervals of 8 to 12 feet in infested areas. Up to two place pac may be used at points of extremely high mouse or meadow voles* activity.

**Baiting Strategy:** Highest bait consumption is expected to occur on the first day or two after treatment begins. After several days, inspect the placement and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity.

Normally, the volume of bait consumed will be significantly less with bromethalin baits than with anticoagulant baits. Although one night's feeding will usually provide a lethal dose, maintain bait for at least one week to provide all rodents a chance to feed on the bait. Continue baiting until all signs of feeding have ceased.

**FOLLOW-UP:** Replace contaminated or spoiled bait immediately. Using gloves, collect and properly dispose of all dead, exposed animals and leftover bait. To discourage reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation occurs, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish them as needed.

**PRECAUTIONARY STATEMENTS**

**Hazard to Humans and Domestic Animals**

**CAUTION:** Harmful if swallowed. Keep away from children, domestic animals and pets.

At handlers (including applicators) must wear shoes plus socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

**User Safety Requirements**

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washes exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediate-

**ENVIRONMENTAL HAZARDS**

This product is extremely toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, to or areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsate.

**Note:** Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow voles, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied to tamper-resistant bait stations.

Do not wash bait. Do not place bait near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment, or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied to tamper-resistant bait stations.

Do not discard bait.

HAVE LABEL WITH YOU WHEN OBTAINING TREATMENT ADVICE

IF SWALLOWED:
• Call a poison control center, doctor, or 1-877-854-2494 immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.

TREATMENT FOR PET POISONING

If an animal eats this bait, call a veterinarian at once.

NOTE TO PHYSICIAN OR VETERINARIAN

Contains the nerve poison Bromethalin. This product is not an anticoagulant type rodenticide. For humans or animals ingesting bait and/or showing poisoning signs (such as muscle tremors, loss of hind limb use, or seizures for animals), limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.

This Product May Only be Used Inside and Within 100 Feet of Man-Made Structures

KILLS RATS, MICE, & MEADOW VOLES*

KILLS ANTICOAGULANT RESISTANT NORWAY RATS, ROOF RATS AND HOUSE MICE

Norway rats, Roof rats and House mice cease feeding after consuming a toxic dose.
